## There's more brawn to our building.

We've just finished beefing up our building by an additional 10,000 square feet.

For us, that's some development. But for you, it means even more. Because our recent expansion will allow more room for machine tools. Increased manufacturing capabilities. And more warehousing space.

And it all was made possible through the growing demands of you, the Kinetic customer.

So we're making sure that you benefit most from your new addition — by guaranteeing you'll continue to enjoy the same high level of quality and reliability you've come to expect from Kinetic products and service.

## More precision in our product line.

Introducing the Kinetic Certified Winding Mandrel.

An amazing piece of precision machinery that thrusts the technology of mandrel balancing years forward, while eliminating a major source of downtime and maintenance expense for the paper manufacturer.

This industry breakthrough is yet another step in Kinetic's ongoing effort to engineer products on the cutting edge of innovation.

Kinetic shears, blades, slitters, perforating blades, scrap choppers and knives have long been recognized as the finest available. They've performed for years with remarkable reliability in installations around the world.

And that kind of record can really take a weight off your mind.

## More clout in our commitment.

We're enthused and excited about these new developments at Kinetic.

So we're backing them up with a renewed commitment to the Kinetic tradition.

A tradition of promises made — and kept. Of trust earned and valued. Of first-rate service on a first-name basis.

All delivered by means of the best machinery, the finest facilities, and the most dedicated people available anywhere.

At Kinetic, we've added new muscle all around.

And we're just warming up.
